

Reading Cinemas Victoria

July-December 2026 Movie Programming Recommendations

Purpose

This document provides a shortlist of movie programming recommendations for Reading Cinemas' nine Victorian locations from July 2026 to December 2026. The aim is to identify selected films that Reading Cinemas may want to look into based on release timing, country, language, audience fit, local demographic opportunity and likely demand across different cinema locations. The recommendations are not intended to replace final programming decisions. Instead, they provide a practical planning guide to help identify which films may be worth testing at specific Reading Cinemas locations through selected sessions, targeted promotion and local audience monitoring.

How to Read the Tables

Each month is presented using two tables.

Table 1: Movie Details provides the basic information for each film, including the release window, country, language and expected audience fit. This helps identify what type of audience each movie may appeal to.

Table 2: Programming Recommendation provides the suggested Reading Cinemas locations, the reason for the recommendation and a practical test strategy. The recommended locations focus on the strongest cinema fits rather than listing every possible location.

The same **S.No.** is used in both tables so that each movie can be easily matched between the movie details table and the programming recommendation table.
